

THE SCI 07 CHRONICLE

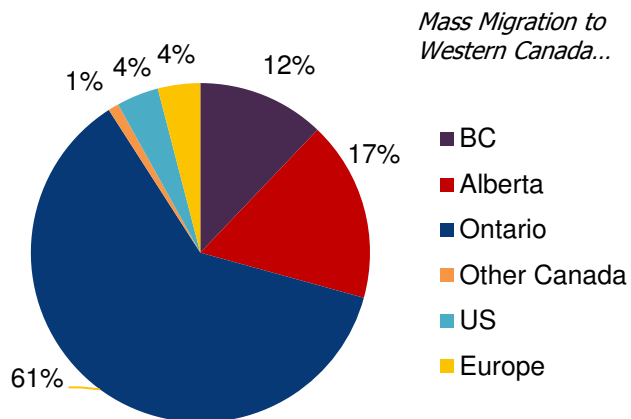

Aug 2014 – Vol VIII

So turning 30 is happening.....how did that happen?

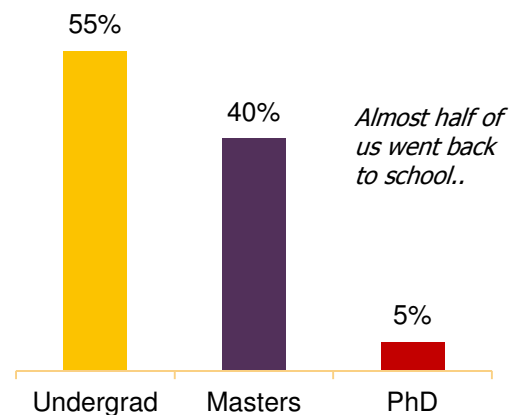

CLASS STATS

So you wanted to know where everybody wound up? Here's the top level stats!

Where are you living?

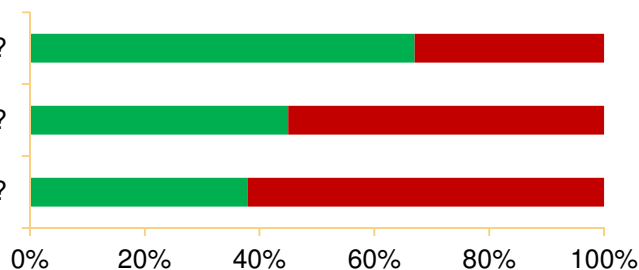

Highest Education?

Job to do with Engineering?

Did you get a P.Eng?

Working at the same place?

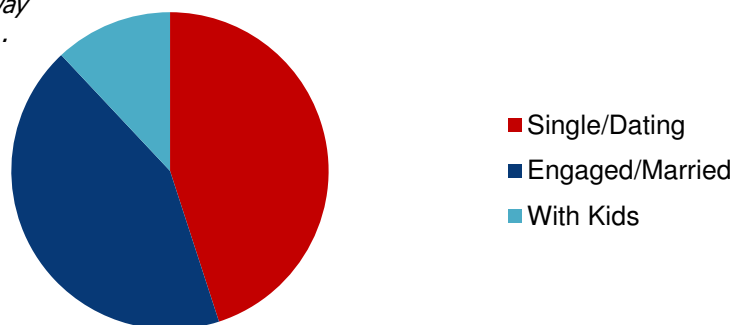

Why are more people doing technical work than have their P.Eng?!

■ Yes
■ No

Life Status?

We've officially passed the halfway point on the class settling down..

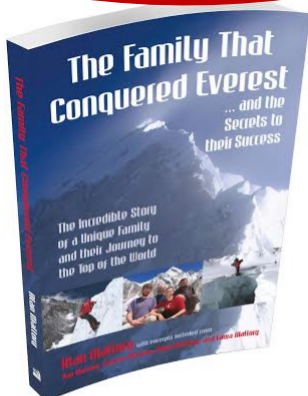

Lives Lived

Living!!

BOOK AUTHOR

ALAN MALLORY

Alan Mallory, has recently published a book entitled "*The Family that Conquered Everest...and the Secrets to their Success*". Alan and his family are the first family of four to set foot on the summit of the world's highest peak,

Mount Everest. It was a two-month journey filled with emotion, loyalty, boldness and terror. From staggering across ladders spanning bottomless crevasses and fighting the many altitude-related sicknesses to climbing through a blizzard in the dead of night and almost losing two family members forever, every segment of the climb was an exhilarating adventure. This richly illustrated book is built around their expedition and above all highlights the importance of strong family values, solid team dynamics and living your dream!

Alan's book is available at Chapters, Amazon, and many local bookstores or contact Alan directly to arrange for a signed copy. Contact details and other information can be found on Alan's website: www.alanmallory.com.

NUTRITIONIST

JESSE SCHELEW

After seven years of working as an engineer at the Ministry of Transportation Ontario (MTO) I quit my job to follow my dreams! While I was still working at MTO I went to night school to become a Certified Nutritional Practitioner, aka Holistic Nutritionist. In May I took the leap and left my engineering job to become Holistic Nutrition full time. I founded my website JesseLaneWellness.com where I share healthy recipes and holistic living tips and consult with clients worldwide via Skype. I also work out of Yellow Gazebo Natural Health Care clinic in Toronto. I work with people experiencing all sorts of health complaints but I focus on digestion, food and

seasonal allergies, candida, low energy, stress, insomnia and joint/muscle pain. What is holistic nutrition you might ask? Holistic Nutrition looks at the body as a whole, while considering the physical, environmental, emotional and nutritional components of the individual's life. Food and diet have incredible healing powers that have a significant effect on your overall health. Holistic Nutrition is a natural and gentle approach that promotes eating a whole foods diet, living a vibrant lifestyle and thriving in an environment free from toxins. I am so excited to finally be able to say that I love my job! I am passionate about nutrition and love helping people adopt fun healthy habits that leave them bursting with energy and free from health complaints. In addition to working with clients, I do engaging wellness workshops, lunch and learns and am a co-author of *The Holistic in the City 21 Day Smoothie Guide*.

FINLAND

RYAN ZIZZO

When Ryan Zizzo's partner was offered a great position in, Finland it was an opportunity too good to turn down! Ryan left his position as a Project Manager with Halsall moved to Finland's capital, Helsinki

Since then, Ryan has been exploring Europe and learning about innovative Nordic green building practices. The most dramatic differences revolve around transportation. Helsinki has seamless integration between various municipal and regional transportation systems, including trams, metro, buses,

regional commuter rail, and even ferries. Since 2002, payments can be made using a reloadable travel card (much like Ontario's 'Presto' card). Helsinki's metro (subway) cars are fully cellular and wifi enabled.

Many downtown streets have large, separated lanes for pedestrians and cyclists. While most suburban areas have biking / walking networks separated from vehicular traffic, complete with their own underpasses and bridges to ensure safe crossings. They even have a new 'on-demand' public transport service that uses high-end minibuses. The service, KutsuPlus, lets you choose your pick up location via smartphone app. An algorithm then determines the best route for getting to your destination while picking up / dropping off others along the way.

Aside from leaning how to create more sustainable societies, Ryan has learned much from his two years in Finland, including the impenetrability of the Finnish language, the importance of vitamin D tablets during the winter, and the necessity for a weekly (at absolute minimum) sauna!

Ryan launched his own green consulting firm (ZED Consulting) - www.zedconsulting.fi - and lectures on green building topics at Finland's main technical college. To contact Ryan about Nordic green building practices? Drop him a line at ryan@zedconsulting.fi

COMPANY SALE

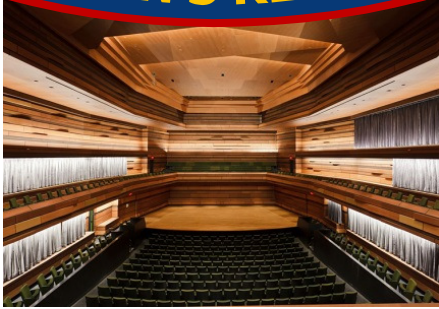

A company started by 3 Sci 07's, **Michele Romanow**, **Anatoliy Melnichuk** and **Ryan Marien**, called SnapSaves was recently acquired for Groupon.

SnapSaves works by users taking photo's of their grocery receipts and then the app sends coupon reimbursements to the user afterwards. The company was founded for less than a year and experienced substantial growth before being acquired.

This is the 2nd company for the team, who previously built the Group Couponing site, Buytopia.

The details of the deal aren't released but it involves some of the team moving to Chicago and joining Groupon. We're all really excited for these serial entrepreneurs!

QUEEN'S REPORT

The Isabel is Open. The Isabel Bader Centre for the Performing Arts opened Sep 13 after a five years of construction. The \$63M building now serves as the new home of the film and media department. Opening performances in the 2014-2015 season include Timber Timbre, The Wooden Sky, and Basia Bulat. So hip.

Queen's v. Samsung. Queen's patent organization PARTEQ Innovations filed a lawsuit against Samsung for the Attentive User Interface (AUI). It tracks the eyes of a user to perform tasks like pausing video when the user looks away. PARTEQ alleges that the technology was developed by a Queen's computer science professor and used by Samsung without permission. Burn.

Don't Hate Me Because I Went to Queen's, Hate Me Because We're, uh, #277. The Center for World University Rankings has placed Queen's 277th out of the top 1,000 world university institutions. The rankings are based off of a number of factors: quality of education, alumni employment, quality of faculty, publications, influence, citations, broad impact and patents. Queen's ranked 12th nationally. Other Canadian universities included University of Toronto ranked 31st on the overall list, McGill University at 42nd, University of British Columbia at 61st, McMaster University at 141st and University of Western Ontario at 152nd.

On the bright side, Maclean's magazine released the results of their 23rd annual University Rankings, placing Queen's fourth in Canada for a third year in a row.

Report: Alice in Wonderland Less Fiscally Responsible Than Swashbucklers. Aye, the Journal reports that Science Formal over budget, pushin' the Science Formal Committee to consider changin' the event in the future. The 2013 theme was "Alice in Wonderland" featurin' a three-storey Queen of Hearts castle – the largest structure the seas 'ave ever seen. University administration is likely to restrict the size of the structure in the future, and the committee may look into changing venues

Richardson Stadium To Be Renewed. As of Jul 2014, with \$6-8 million left to raise, Queen's has started meeting with design firms to plan the football team's future home. The University has raised enough to cover roughly 75% of the stadium's estimated \$25 million cost, according to VP Advancement Tom Harris. The new complex will seat around 10,000 – about the same size as the current stadium (prior to the condemnation of the upper west bleachers last summer).

Say goodbye to your twenties! - Andy Chong

NUPTIALS

Stephanie Kerrigan married **Peter Wilson** and is currently living Surrey, UK

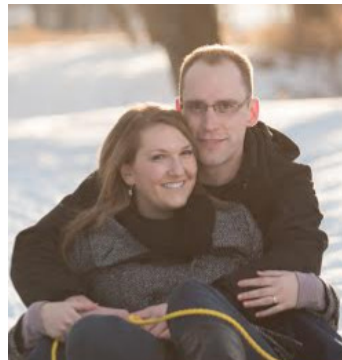

Gus Johnson got married to **Amber Jorgensen** on July

Paige Snelling and **Christopher Mamer** are getting married in Sept

Jo and **Jason** got engaged!

Ken Saddington and **Stephanie Poland** just got Engaged

BABIES

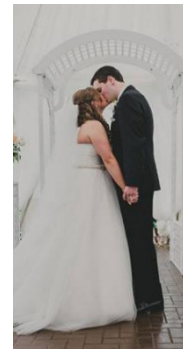

FC Moens and **Emma** just had a little girl named **Georgiana**

Brandon Parsons and **Kat** are expecting a baby

Katie Lardner (de Roo) had a baby (**Benjamin**) with her husband **Tom**

Aaron and **Tara McGregor** just had their first child **Liam** and interestingly the epidural was done by none other than Dr. **Dana Collard!**

Nicole Woodland (Pacque) and her husband **Victor** had a girl **Alicianna** in June.

Brendan Moore and **Christina Renda** got married this summer
